EDUCATION

Georgia Institute of Technology

Expected Graduation May 2028

M.S. in Information Security

University of South Alabama

2022–2026

B.S. in Computer Science, Cybersecurity Concentration | GPA: 3.9

CERTIFICATIONS & AWARDS

CompTIA Security+ | CompTIA CySA+ | AWS Cloud Practitioner

School of Computing Student of the Year, University of South Alabama (2025–2026)

EXPERIENCE

Product Security Assurance Intern | Honeywell

May–August 2026

- Tested firmware, web applications, and software for security vulnerabilities; assessed risk across product lines.
- Used Nmap, Burp Suite, OWASP ZAP, and Gobuster to enumerate services and test web applications.
- Documented findings and remediation recommendations for developers; validated fixes with product teams.

Cybersecurity Intern | Mobile Health Infirmary

February 2025–May 2026

- Monitored network activity for vulnerabilities, supported system hardening, and resolved staff access issues.
- Developed and implemented a NIST-aligned incident response playbook defining severity levels, response roles, evidence handling, and recovery validation to support HIPAA/HITECH requirements.
- Supported migration of on-premises systems to AWS.

Research Assistant, Earthquake Prediction | University of South Alabama

July 2025–May 2026

- Built Python preprocessing scripts with ObsPy and pandas to extract metadata and normalize seismic recordings.
- Tuned a nonlinear phase space classifier across 16 graph features and 600,000 labeled waveforms.

PROJECTS

Engineering Skills Assessment Platform | Co-founder & Developer

July 2026–Present

- Building a browser-based CAD platform for practical engineering assessments using TypeScript, WebAssembly, and a Python/FastAPI backend.
- Implemented token-authenticated session APIs and autosave recovery; addressed path traversal, stale-write conflicts, and submission failure handling.

Nextcloud Security Assessment Lab

August 2025

- Built a Docker lab with nginx, TLS, and MariaDB; tested authentication, sessions, brute-force protection, and CSRF defenses using Burp Suite, OWASP ZAP, and Nmap; documented findings and remediation.

OSCP Penetration Testing Labs | HTB / CPTS

July 2026 - Present

- Practiced service enumeration, web exploitation, packet analysis, and Linux privilege escalation; documented attack paths and findings while preparing for OSCP.

LEADERSHIP & CTF INVOLVEMENT

GreyHat | Member

August 2026 - Present

- Competed in TNC26 CTF, solving web vulnerability challenges by crafting payloads to escalate privileges and capture flags.

Student Government Senator | University of South Alabama

March 2025–May 2026

- Started a School of Computing hackathon, leading it from proposal to execution; passed legislation securing \$6,000 for computing events.

President, Video Game Development Club | University of South Alabama

Fall 2024–May 2026

- Revived an inactive club, rebuilt member engagement, and increased active participation.

TECHNICAL SKILLS

Security: Burp Suite, Nmap, OWASP ZAP, Metasploit, Splunk, Nessus, pfSense, Burpsuite

Cloud & Systems: AWS (IAM, EC2, S3, GuardDuty, CloudTrail, Config), Linux, Docker

Programming: Python, PowerShell, Bash, Java, JavaScript
